ABSTRACTED-PUB-NO: JP10253380A

BASIC-ABSTRACT:

The device includes a memory for storing data of three dimensional maps taken from a view point of predetermined height. A graphic generator with an image generator generates a graphic guide image on the map displayed for guiding a vehicle.

A graphic shape determination unit decides the shape of the graphic guide image on the displayed route, whenever an obstacle is encountered in route. The simple determination unit displays a part of the graphic guide image not hidden by an obstacle.

ADVANTAGE - Offers intelligible course guide.
